

Slide 1: ER Model Concepts

23IT201 • Database Management Systems • Module 3: Data Models & ER Diagramming

Entities represent real-world objects. Attributes describe properties (Simple, Composite, Multi-valued, Derived).

Slide 2: Relationship Sets & Cardinalities

23IT201 • Database Management Systems • Module 3: Data Models & ER Diagramming

Associations between entities: 1-to-1, 1-to-Many, Many-to-1, and Many-to-Many with participation constraints (Total vs Partial).

Slide 3: Weak Entity Sets

23IT201 • Database Management Systems • Module 3: Data Models & ER Diagramming

Entities that do not have a primary key of their own and depend on an identifying owner entity set via an identifying relationship.
