

# Slide 1: SQL Data Definition & Manipulation

23IT201 • Database Management Systems • Module 5: Structured Query Language (SQL)

DDL: CREATE, ALTER, DROP. DML: SELECT, INSERT, UPDATE, DELETE. Integrity constraints: NOT NULL, UNIQUE, CHECK, FOREIGN KEY.

# Slide 2: SQL Joins Demystified

23IT201 • Database Management Systems • Module 5: Structured Query Language (SQL)

INNER JOIN returns matching records. LEFT OUTER JOIN retains all left records. RIGHT OUTER JOIN retains all right records.

# Slide 3: Aggregations & Grouping

23IT201 • Database Management Systems • Module 5: Structured Query Language (SQL)

COUNT(), SUM(), AVG(), MIN(), MAX() with GROUP BY. HAVING clause filters aggregated groups.
